

MARKET REPORT SEPTEMBER 2025

Almonds

Facts/Market Data:

On Thursday, September 11, the position report for August 2025 was published, the first for the 2025 harvest year. At 157.8 million pounds, shipments in August were lower than in the previous year. A somewhat disappointing start to the new almond year. In fact, we have to go back to 2019 to find lower shipments for the month of August.
